PROJECT MANAGER - WAREHOUSE AUTOMATION DIVISION AUTOMATION / OPERATIONS, CHICAGO, IL #21-439

JOB DESCRIPTION:

The Project Manager @ Warehouse Automation Division will be responsible for the coordination of all activities associated with the installation of automated/robotic material handling equipment products at customer sites.

RESPONSIBILITIES

- Act as a liaison between the customer contact(s) on the project site and Corporate departments to coordinate the delivery and installation of automation products, materials and associated labor.
- Develop project timelines and budgets with milestone dates for completion of work. Meet with contractors and customers to ensure project is completed according to schedule.
- Determine and obtain necessary permitting required for the installation.
- Coordinate the work of electromechanics, controls, and software
- Write project reports, memoranda, and correspondence detailing project status and issues.
- Inspect subcontracted installation work of Corporate products to ensure compliance with contractual commitments, safety and labor regulations, and environmental regulations.
- Negotiate with the customer to determine the cost, terms, and conditions of change orders.
- Supervise the installation of Corporate products as well as purchased products and materials
- Resolve and determine alternative solutions to construction, manufacturing, installation, or equipment issues and problems at customer sites.

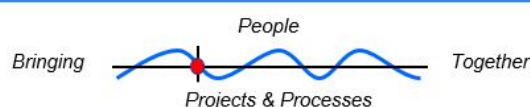

MINIMUM REQUIREMENTS:

- At least 5 years of related experience
- Ability to travel at least 15% of the time, sometimes without notice.
- Must have integrity, highly analytical, and have a strong desire to be deeply involved in the business.
- Organized and methodical in their work, with the ability to learn quickly and adapt easily to change.
- Able to persevere through difficult work challenges with the highest degree of dedication.
- Strong interpersonal skills with the confidence to interact and communicate effectively with personnel from all levels of the organization
